

Attention: Mr. Michael Powell, Chairman

Dear Sir:

It is reported that Singapore Technologies Telemedia (STT) has overcome the final hurdles required before it can formally take possession of the assets of Global Crossing (GX) - a role both parties have played well in their cover-up.

We all know by now that President Bush rests his hands in your Office to make the grave decision and a wrong move will alter the futures of all U.S. telecom companies.

It is because of this critical moment that we come out to URGE you not to be intimidated by those who go for their self interests, a few of the Americans, BUT for the sake of the NATION, the American people, that you have to take the most important consideration.

AGAIN, it is worth repeating to remind you of the FRAUD which is clear to the world why a seamless fiber optic network system, one of its kind that cost billions of investors funds and years to build to be given to STT at \$250M when there are other higher offers, one with shareholders included, COMMAXXESS. Also the STT/GX deal wipe off shareholders with \$0 and Management get back 8% stake of the company. At the same time, the GX spent \$163M on consultancy/advisory fees to get the deal go through when they are declaring bankruptcy.

GX claimed the sale to STT is to facilitate "free trade". We want to draw your attention that the Singapore Government is fully aware of this "fraudulent" bankruptcy that involved the transfer of American assets to the Singapore Government - hence the job loss and transfer of jobs, as can be seen lately in GX.

On the issue of NATIONAL SECURITY, it is without doubt that nothing can be COMPROMISED with terrorism both at home and abroad. In fact, I would claim this sale of GX to STT as the Financial Terrorism. Something which STT/GX claimed to work together on World Trade, whereas they are trying to take advantage of the American technologies, a CONVENIENCE and BARGAIN to them to get the network system at such a cheap price, without spending the time to build it (ready-made). They have already got the Asia Global Crossing which should not be given out in the first place. This time "NO" to them for GX, it is supposed to be left for American investors.

The Americans are too generous or magnanimous and when it comes to overly done, they will be considered as STUPID. After all, ITS THE FRAUD, STUPID.

Thanks for taking the time,

Regards,

L.Y. Wong
